

Measurement in the Social Sciences

By Jr. , H. M. Blalock

Transaction Publishers. Paperback. Book Condition: New. Paperback. 470 pages. Dimensions: 9.1in. x 6.0in. x 1.1in. Among the frustrations constantly confronting the social scientist are those associated with the general process of measurement. The importance of good measurement has long been recognized in principle, but it has often been neglected in practice in many of the social sciences. Now that the methodological tools of multivariate analysis, simultaneous-equation estimation, and causal modeling are diffused more widely into the social sciences, and now that the very serious implications of random and non-random measurement errors are being systematically investigated, it is all the more important that social scientists give top priority to the quality of their data and the clarity of their theoretical conceptualizations, as well as to methods for analyzing fallible data. This book deals with selected problems of measurement and is written for graduate students and professional social scientists, particularly in the technically less developed fields of sociology, political science and anthropology. The book is organized so that, in general, one proceeds from problems of data collection to those of data analysis. It is not intended to be a complete work covering all types of measurement problems that have arisen in the social...
